COP 28! How can we look after our planet?

We must look after our planet! It is life to all of God's creatures great and small. Each of us must do our best to buy less, fix more and remember to reuse, reduce and recycle. We can help to keep our planet clean by walking more. The planet is not ours, we are just using it so we must make sure to give it back as it is given to us.

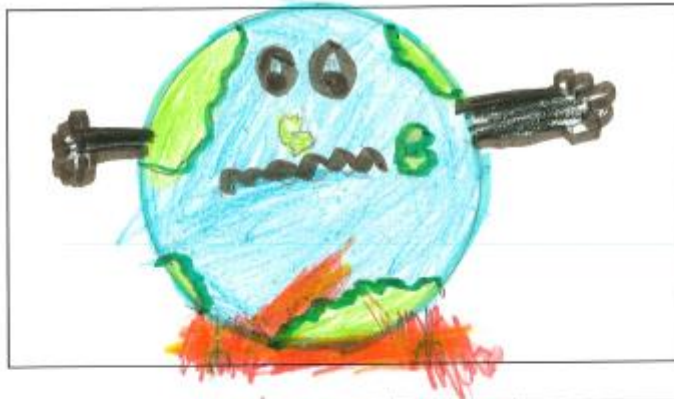

Hope

~~I have tried~~
to help stop climate change we should shower quickly to save water. Turn off lights or electronics you are not using to save energy. Walk to school to save fuel and have less fumes. My brother once dropped litter and I picked it up.

We all need to work together to protect our home earth.

Sebastian

We can save our planet by looking after the sea, rivers and lakes. Also the land. We need to keep our animals safe in the whole entire world. You must get a trash bin and get started.

Reuse, Reduce, Recycle are very important ways we can help to look after our planet. firstly we Reduce or Reuse before we Recycle. It is important to take care of our belongings so they last longer and can be passed on for other people to use. Clothes can be reused by other people and the materials can be recycled to make new clothes.

Each year, every house in the UK produces about 2 tonnes of waste - that's about the same as a Great White shark!

If everyone was more careful and read the labels 60% of what we throw away is actually recyclable. A simple way to reduce the use of plastic is to always carry a refillable water bottle and by using reusable shopping bags.

The most important thing is to reduce and this can be done very easily, for example:

- * Turning the tap off when you brush your teeth
- * Turning off lights when you leave the room.
- * Only taking the food you can eat.

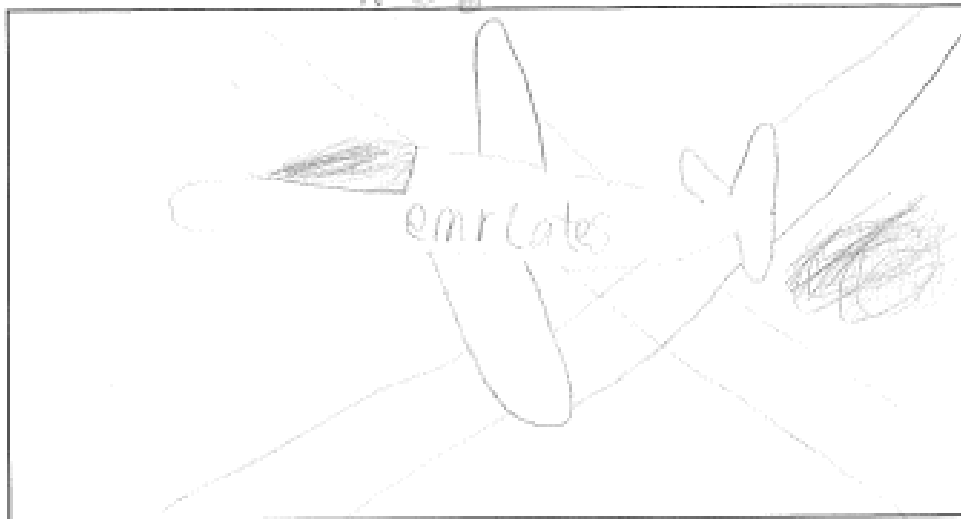

We need to recycle our rubbish. If we throw rubbish in the water the sea animals will get sick or get hurt. We are chopping the trees to make paper, but trees give oxygen and if we chop down trees we won't have oxygen. We can look after the planet by turning off the lights and not leaving the tap on. We must also walk to school because when we drive the car,

carbon dioxide comes out and we will get sick. People should use solar panels because then you are not wasting electricity.

Earth is a wonderful place to us and we must look after our planet together.

There are lots of ways
to save the planet. Perhaps
we could all use less
electricity for just five minutes
every Sunday. Another
idea is to plant more plants
in our garden. It's up to
us to save the world!
